PROFILE

Hi, I'm Anik, a Computer Science undergraduate passionate about web development. I thrive on taking on new challenges and continually pushing myself to grow. I value critical thinking, punctuality, and attention to detail. My journey, from having no coding experience to self-learning web development, has been an exciting one, and I remain committed to mastering modern technologies as I progress in this field.

PROJECTS

Car Booking System

- Built with Laravel (PHP Framework) for efficient back-end development and MySQL for database management.
- Incorporated JavaScript for interactive user interfaces and HTML/CSS for responsive design.
- Enhanced functionality for users to browse vehicles by category, check details and availability, and manage bookings with ease.
- Integrated a testimonial and contact form feature, ensuring seamless user engagement.
- Planned future scalability by utilizing the MVC architecture, enabling clean code organization and maintenance.

Online Food Ordering System

- Developed using PHP for back-end logic, ensuring a robust and scalable system for online food ordering.
 - Designed an advanced search and filtering system to enhance user experience and make food selection quick and efficient.
 - Utilized HTML/CSS and JavaScript for a user-friendly, responsive interface, ensuring accessibility across all devices.
 - Integrated MySQL for real-time database updates, enabling smooth order management and an uninterrupted user experience.
-

SKILLS

- Programming Languages: JavaScript, CSS, HTML, PHP, Java, C, Python, Dart
 - Frameworks/Tools: Laravel, Flutter
 - Database Management: MySQL
 - Architectures: MVC
-

EDUCATION

Whitefield International College

2021-Ongoing

- Bachelor in Computer Application
